

COOL-LITE® SKN 175 II

COOL-LITE® SKN 175 II

Adapt to perform

COOL-LITE SKN 175 II - Saint-Gobain Glass launches a new, highly selective, solar control glass with market leading aesthetics and unbeatable sustainability credentials.

COOL-LITE SKN 175 II, a to-be-tempered, building glass, joins the Saint-Gobain Glass range. It is a product developed to enable adaptability, as the business works with customers and partners to make the world a better home, focussed on reducing energy consumption and achieving net zero carbon emissions by 2050.

“We have responded strongly to the demand for a product in this performance band, that maximises the benefits of choosing Saint-Gobain products, based on exceptional quality, process-ability and the need for sustainable solutions.

Adaptability is vital to enable change throughout the glazing supply chain. We aim to make it as straightforward as possible for our customers to adapt their glazing solutions in a fast changing world, by offering products, services and digital tools to help them every day, to specify, manufacture and install glazing that delivers comfort, safety and sustainability.” Comments Lauren Whittaker, market manager at Saint-Gobain Glass UK & Ireland.

COOL-LITE SKN 175 II is a product that can help building designers and those working in construction to adapt their glazing and façade solutions to fight climate change, by using solar control glass that delivers enhanced, sustainable performance. The product can be adapted to a wide variety of glazing applications, including offices, educational buildings, healthcare facilities and mixed-use developments. It offers maximum daylight and a leading, neutral aesthetic, along with a robust solution to the growing demands for reduced energy consumption and reduced CO2 emissions in new and refurbishment building projects.
