

SGG EASYPRO®

Description

SGG EASYPRO is featured on our SGG COOL-LITE II product range as standard. As this is a sacrificial coating that burns off during the tempering process there are no specific product applications.

ADVANTAGES

SGG EASYPRO offers a significant amount of benefits to the glass processor, including:

- Shorter tempering cycle times
- Extended storage time
- No cover/backing sheets required
- Non-sealed packs so saves time and is safe
- Extended shelf life of rest plates
- Increased shelf life after edge working
- Easier transporting of glass with reduced scratching
- Reduction of waste & quality issues
- No need to remove any traditional film applications
- Subsequently no generation and disposal of waste

For the full list of benefits and further detail please see the SGG EASYPRO brochure.
