

SGG COOL-LITE® SKN 165/165 II

Description

The coating allows the light through while reducing the solar heat, making it ideal for commercial glazing where high levels of light transmittance coupled with a low solar factor are required.

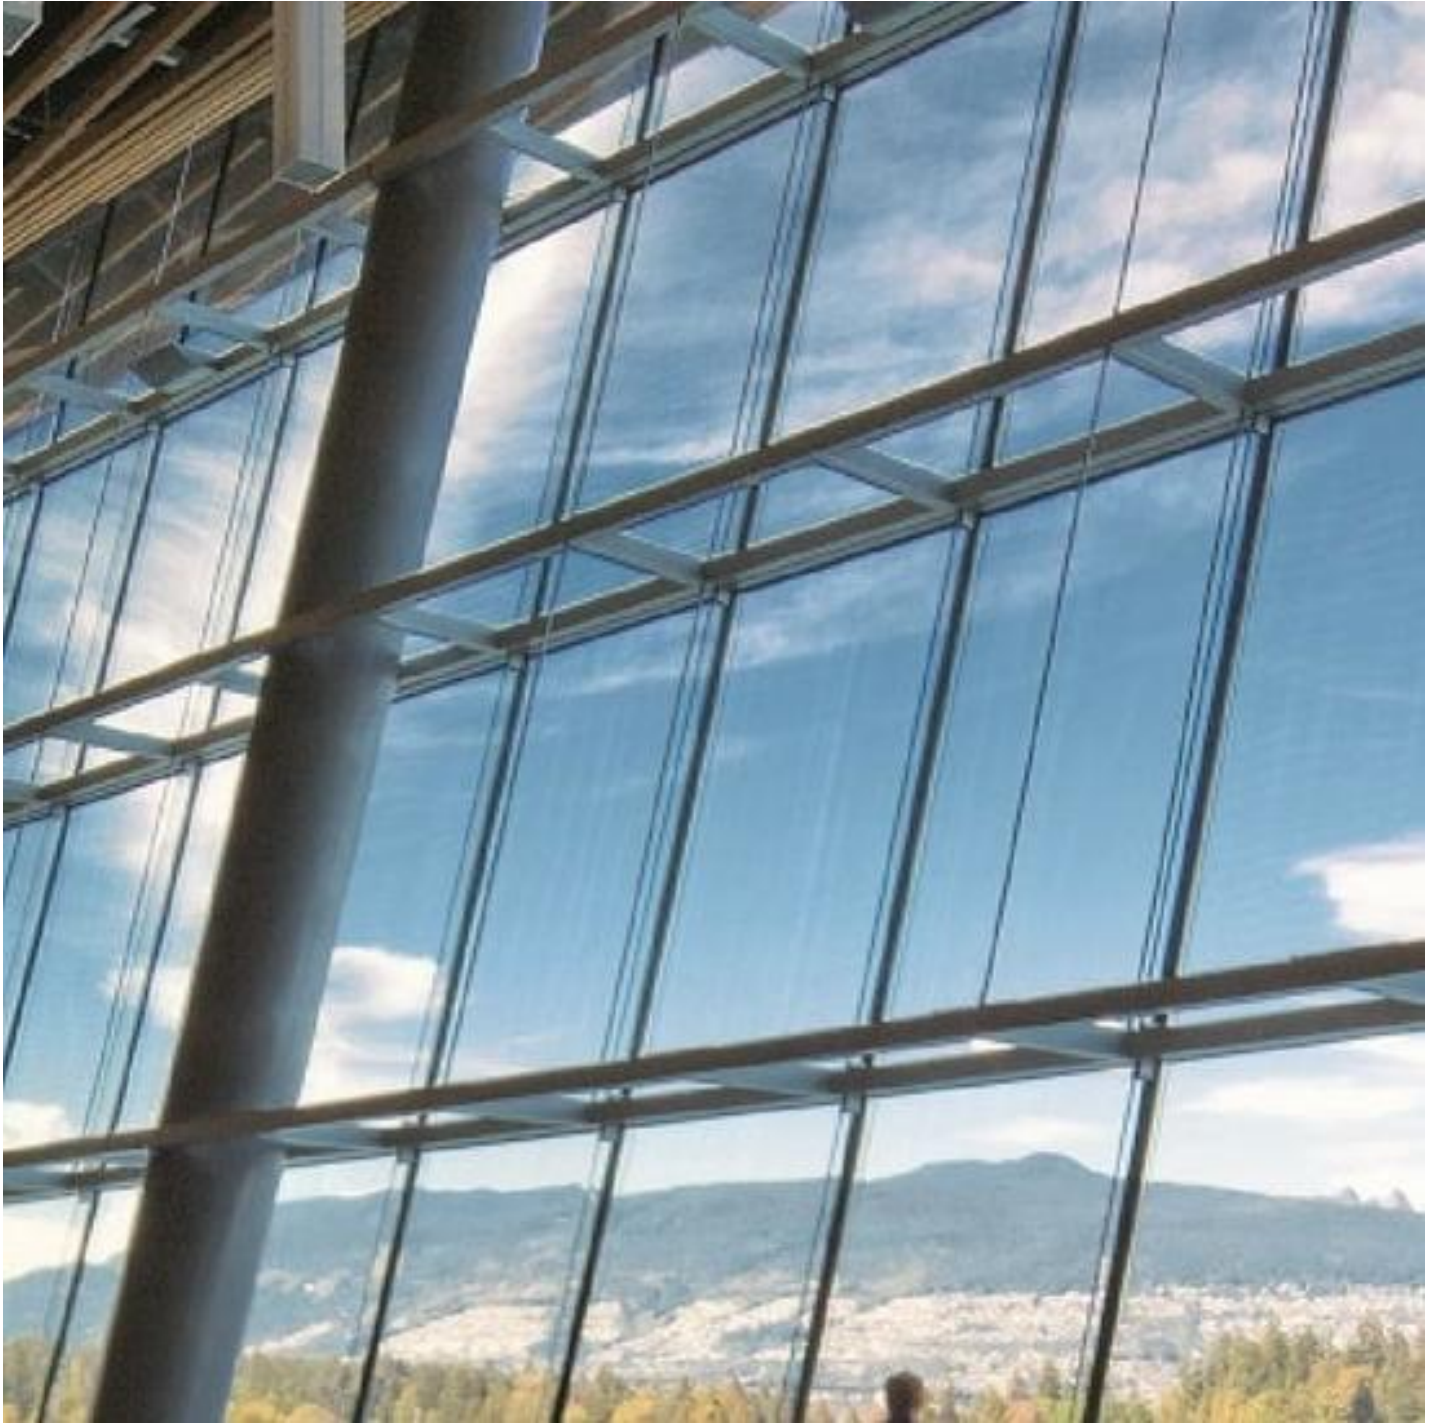

Ideal for offices, hotels, restaurants, schools, hospitals and many other commercial buildings.

Installation

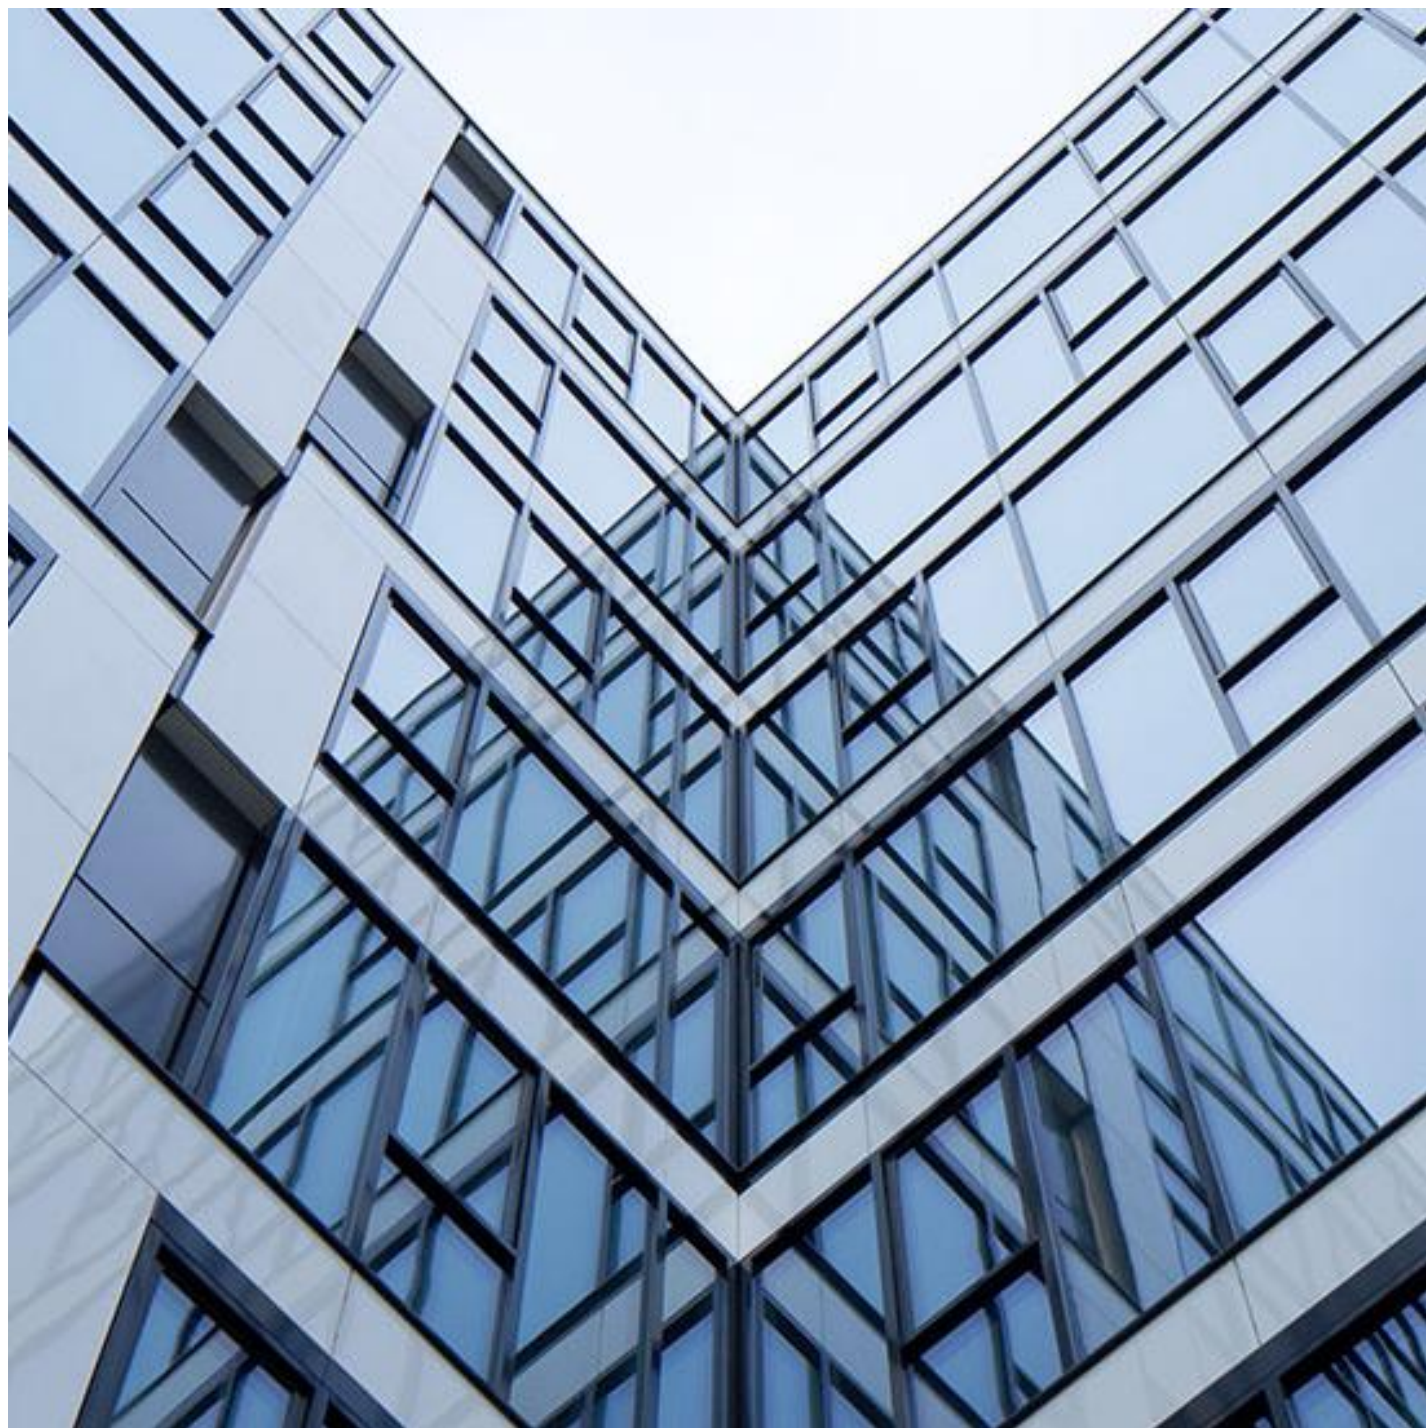

SGG COOL-LITE SKN can be installed in many glazing applications:

- Curtain walling
- Exterior structural sealant glazing
- Exterior bolted glass assemblies
- Double-skin applications
- Cladding of external walls
- Overhead and atria glazing
