

CONTRAFLAM LITE

Description

CONTRAFLAM LITE is suitable for both internal and external applications. It can either be glazed into doors or screens as a single pane or as a double glazed unit. Large pane sizes available: extensive test data is available. Multifunctional & flexible product offering decorative and functional alternatives.

CONTRAFLAM LITE is designed for use in doors and is only 11 mm thick. It offers 30-60 minutes integrity and partial insulation protection (EW30-EW60). Typical application areas for these products:

- Data server rooms
- Refuge terraces
- Fire doors
- Fire partitions
- Fire exit corridors
- Fire exit staircases

CONTRAFLAM LITE can also be used in a range of formats, depending on the application:

- Single glazing
- Double glazing
- Roof glazing (CONTRAFLAM LITE SKYLITE)
- Contraflam lite

CONTRAFLAM LITE can be combined with products that offer safety & security (STADIP, STADIP PROTECT), enhanced thermal insulation (PLANITHERM), acoustic (STADIP SILENCE), solar control (ANTELIO, COOL LITE, PARSOL), Decorative (MASTERGLASS, SATINOVO, EMALIT, PRIVALITE) and glass flooring (LITE-FLOOR)

CONTRAFLAM DOOR LITE is a special product for use in doors and is only 11mm thick. It offers 30-60 minutes integrity and partial insulation protection (EW30-EW60).
